

F. No. 15/47/2016- SBM-1

Dated: 02.03.2017

Dear Sir/ Madam,

As the Swachh Bharat Mission progresses, several national and international companies are approaching to the Central Ministries/states/ ULBs and are confident to demonstrate their technologies and its future potential on ground. However, in many cases, due to lack of mechanism to evaluate/certify/recognize these technologies, they are not able to win the confidence of project implementation authorities and move forward.

2. In view of above, Ministry has constituted a "Technology Evaluation Committee for Solid & Liquid Waste and Water Supply" under the Chairmanship of Dr. R. A. Mashelkar, Ex DG, CSIR. The committee will evaluate such emerging/innovative technologies and disseminate them to States/ULBs with necessary advisories so that the same could be adopted in various Missions under implementation by MOUD like SBM, AMRUT and Smart cities etc.

3. Therefore, I request you to share such emerging/ innovative solutions for consideration by Ministry. Some of these potential technologies would be extended financial support also to test it on pilot basis as per recommendations of Committee. The detailed proposal along with an Executive summary (not exceeding 3 pages) and a presentation (maximum 10 slides) can be e-mailed on tecmoud@gmail.com for consideration of Committee. You may also contact Shri V. K. Chaurasia, Adviser (I/c), MoUD on 011-23061144 in case of any query.

Thanking you,

Yours sincerely,

(Praveen Prakash)
