

D.O. No. DR/SBM/27/2017

Dated 13th June, 2017

Sub: Identification of bulk waste generators and purchase of decentralized composting machines by them

Dear Sir/Ma'am,

As you are aware, the Solid Waste Management Rules 2016 require bulk waste generators, i.e. establishments that generate more than 100 kgs of waste per day, to segregate their waste at source and process, treat and dispose of biodegradable waste within premises to the extent possible, through composting or bio-methanation.

2. In view of this, the next Swachh Survekshan will take into cognizance the number of bulk waste generators in each city, as well as whether they are segregating their waste and composting the biodegradable component of that waste.

3. In order to ensure a good score in this area as well as to facilitate compliance with the specified rules, you are requested to identify and enumerate all bulk waste generators in your city and encourage them to purchase decentralized composting machines.

4. For your information, the National Seeds Corporation Ltd, a Government of India PSU, is directly marketing decentralized composting machines. For more information on the machines and their rates, you may visit their website (<http://nsc.gov.in/MISCAind.html>) or reach out to Mr. Vinod Kumar Gaur (011 2548 2093, cmd@indiaseeds.com), CMD of National Seeds Corporation. For any information from the Ministry for the same, you may reach out to Ms. Ditsa Roul (+91 9811435040) of the PMU.

I look forward to your continued support in Swachh Bharat Mission.

With regards,

Yours sincerely,

(Praveen Prakash)
